Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the mating sections on the injector as recited in claims 5 and 9, the coupling element interior cavity as recited in claim 7, the motor recited in claim 8 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 4, 7, 8, and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3763

5. Claim 4 recites the limitation "the body of the syringe." Claim 8 recites "the portion of said extension." Claim 9 recites "said syringe mounting." There is insufficient antecedent basis for these limitations in the claims.

6. Claim 7 fails to distinctly claim the subject matter Applicant regards as his invention because it recites a coupling element with an interior cavity, though the specification and drawings do not show any coupling element having an interior cavity.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by NEER et al. (U.S. Patent No. 5,300,031). Neer shows a syringe having a barrel, plunger with a knurled coupling element, conical front, syringe mating sections comprising an annular flange fixed to the syringe body, and an interior cavity in the coupling element (See Figs. 4,5,11,12). The coupling element is considered knurled because it includes a protuberance. The interior cavity in the coupling element is the side cavity formed by the protuberance and face of the plunger. Neer also discloses a movable face plate 127 movable by a rotatable lever 138.

Art Unit: 3763

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. CONERO et al. (U. S. Patent No. 5,545,140) shows a syringe plunger driver assembly. REILLY et al. (U. S. Patent No. 5,997,502) shows a syringe mounting assembly in an injector housing.
